Overview

Table of Contents		Why Manage Research Data?	Subject Guide
Write Your Data Management Plan	Learn how to evaluate your data needs and create a data management plan.	Effective data management will: • Save time: Planning for your data management needs ahead of time will save you time and resources in the long run. • Increase your research efficiency: Have you ever had a hard time understanding the data that you or your colleagues have collected?	
Manage Your Data	Find out the common and best practices in data management.	Documenting your data throughout its life cycle <i>saves time</i> because it ensures that in the future you and others will be able to understand and use your data. • Facilitate new discoveries: Enabling other researchers to use your data relinforces open scientific inquiry and can lead to new and unanticipated	
Share Your Data	Learn about the benefits of sharing data and how to do it.	 discoveries. And doing so prevents duplication of effort by enabling others to use your data rather than trying to gather the data themselves. Meet grant requirements: Many funding agencies now require that researchers deposit in an archive data which they collect as part of a research project. 	Nick Ruest Contact Info Send Email
Templates & Downloads	Find sample plans, checklists, and other materials.	 Support Open Access: Researchers are becoming increasingly more aware of the need to manage their work and consider issues of scholarly communication. The Open Data movement advocates for researchers to share their data in order to foster the development of knowledge. 	York Librarians Can Help You With:
More Guides	A collection of useful guides on research data management.	 Increase Research Impact: by maximizing the visibility of the data and promoting transparency in search Ensure compliance: to meet the requirements of the institution or funding agency 	Data management practices Data Management Plans (DMPs) Archiving your data
Contact	Have questions, need answers? We can help.	 Improve accessibility: ensuring that the quality and integrity of the data is maintained during and beyond the life cycle of the project Safeguard research data: by establishing appropriate storage, back-up and 	Contact us for more information.

<u>Kim Pham</u> This research guide	e was created by the		
wonderful work of Kim Pham, a University of Toronto iSchool student, during a 105hr practicum in the summer of 2013.		Research Lifecycle Data management is an integral part of the research lifecycle.	

Get to know your data

Who are the data owners?

What type of data will be produced?

What is the expected volume of data that will be produced?

What data formats will you use?

Organization

What is your file naming convention?

Will you version the data?

What supporting documentation will you provide?

What relationships does your data have to other data?

Access & Sharing

Will you share the data you collect or create?

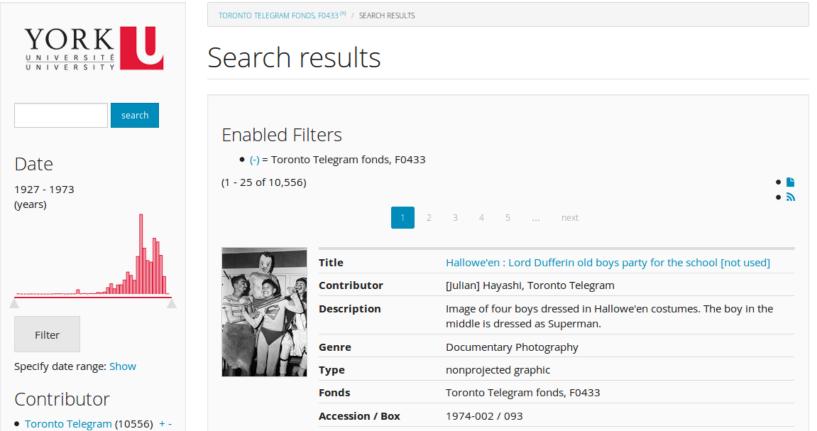

Copyright and Intellectual property rights

Are there any ethical issues?

How will you store and backup the data?

Where do you intend to archive or deposit the data after the project is complete?

SP Dataverse Network

Search this Dataverse Network		Search
Advanced Search Tips		nced Search Tips

The Scholars Portal Dataverse network is a repository for research data collected by individuals and organizations associated with Ontario universities. The Dataverse platform makes it easy for researchers to deposit data, create appropriate metadata, and version documents as you work. Access to data and supporting documentation can be controlled down to the file level, and researchers can choose to make content available publicly, only to select individuals, or to keep it completely locked. All data is hosted on Canadian servers, in a secure environment that conforms to industry best practices for maintaining data integrity and longevity.

Dataverses

Create Dataverse

40 Dataverses

) A Dataverse is a container for research data studies, customized and managed by its owner.

YorkSpace Home

Welcome to YorkSpace

YorkSpace is York University's Institutional Repository. It is a platform that enables York community members to organize and preserve their research online in an institutional context. It showcases the scholarship of the York University community through the use of a special standards-based software platform that collects usage statistics and provides exceptional visibility on the web.

To learn more about YorkSpace, visit the YorkSpace Resource Site.
