

HEALTH STUDIES AT YORK UNIVERSITY

shpm.info.yorku.ca

A world of options are available with a Bachelor of Health Studies degree (90 or 120 credits). The demand for Health Professionals including Health Managers, Information and Policy Specialists has grown by 53% between 2007 and 2017 (Jobs: Hot and Not-so-hot, Higher Education Strategy Associates 2017). Curious minds wanted!

- ✓ **What's on your mind?** Customize your degree with a Bachelor of Health Studies in Health Informatics, Health Management or Health Policy or a degree that combines the elements of all three
- ✓ **What are you good at?** Learn about health within a stimulating multi-disciplinary environment informed by the social sciences, humanities, law, medicine, engineering and the arts (see sample areas of study)
- ✓ **How do you learn?** Study with top level health researchers and expert practitioners. Gain hands on, experiential education opportunities inside and outside the classroom
- ✓ **What's in your heart?** Acquire prerequisites for medical school, professional schools (e.g. law) as well as prepare for graduate school (MA, PhD) in areas including health policy, health management, health informatics, health promotion, critical disability studies and more
