York University
Global Health Program, Faculty of Health
Toronto, Ontario

The Global Health Program, Faculty of Health, York University invites applications for five professorial tenure stream positions across several areas of global health (see below) to commence July 1, 2019. We are seeking faculty interested in contributing to our unique approach to global health that emphasizes equity, governance, policy and innovation. The intention is to hire candidates whose research and teaching is mutually synergistic and complementary with each other and York’s existing faculty. The successful candidates will teach in the interdisciplinary BA/BSc Global Health program, contribute to the development of new Masters and PhD programs in Global Health, and participate in a highly productive and collegial academic community including the Dahdaleh Institute for Global Health Research. More information about global health at York is available at [http://globalhealth.yorku.ca](http://globalhealth.yorku.ca) and [http://dighr.yorku.ca](http://dighr.yorku.ca)

Successful candidates must demonstrate excellence or the promise of excellence in teaching and externally-funded research and be suitable for appointment to the Faculty of Graduate Studies. Teaching experience with demonstrated use of pedagogical innovation using experiential education and/or technology-enhanced blended learning is preferred.

Salary will be commensurate with qualifications and experience. All York University positions are subject to budgetary approval.

The positions are as follows:

1. **Community Health**

Applications are invited for a tenure-track professorial-stream appointment in **Community Health** at the rank of Assistant Professor to commence July 1, 2019. Salary will be commensurate with qualifications and experience. Applicants should be focused on community health from a global health perspective. The successful candidate will have expertise in applying intersectional anti-colonial and anti-oppression frameworks and a social determinants perspective to research and teaching in areas such as community health, mental health, disability, and Indigenous health. Experience working in community health practice, policy, and/or management preferred. Applicants must have a PhD (or a Ph.D. near completion by the start of the appointment) in Global Health, or in a related health or social science discipline with a substantive focus on global health aspects of community health, health policy, health systems, health care ethics and/or human rights.
2. **Social Epidemiology**

Applications are invited for a tenure-track professorial-stream appointment in **Social Epidemiology** at the rank of Assistant or Associate Professor to commence July 1, 2019. Salary will be commensurate with qualifications and experience. The successful candidate will be a social epidemiologist with expertise in global governance, a very strong interest in applying their expertise to the global collective action problem of antimicrobial resistance, and a willingness to take an administrative leadership role in the activities of York University’s proposed World Health Organization Collaborating Centre on the Global Governance of Antimicrobial Resistance and to build their research agenda around the Centre. Applicants must have a PhD (or a Ph.D. near completion by the start of the appointment) in Social Epidemiology or Global Health, or in a related health or social science discipline with a substantive focus on the social epidemiology of global health using a global health equity theoretical lens.

3. **Global Health Epidemiology**

Applications are invited for a tenure-track professorial-stream appointment in **Global Health Epidemiology** at the rank of Assistant Professor to commence July 1, 2019. Salary will be commensurate with qualifications and experience. Applicants should be focused on global health epidemiologic methods. The successful candidate will provide a leadership role within the Faculty and the Global Health Programs in supporting the development and application of rigorous epidemiologic and/or biostatistics methods to the study of today’s most pressing global health challenges. Applicants must have a Ph.D. (or a Ph.D. near completion by the start of the appointment) in Epidemiology, Global Health or Public Health, or in a related health discipline with a substantive focus on the epidemiology of global health, including patterns of disease and environmental factors relating to, or determining population health.

4. **Program Evaluation**

Applications are invited for a tenure-track professorial-stream appointment in **Program Evaluation** at the rank of Assistant Professor to commence July 1, 2019. Salary will be commensurate with qualifications and experience. Applicants should have expertise in the evaluation of complex programs and policies, particularly as they relate to global health and global health equity. Applicants should have a strong understanding of complexity science in the context of program and policy evaluation and interest in impact and process evaluation of global health initiatives, global health agencies, or humanitarian assistance across national health systems. Applicants must have a Ph.D. (or Ph.D. near completion by the start of the appointment) with a focus on complex program evaluation. Professional experience in program evaluation would be an asset.
5. Global Health Policy

Applications are invited for a tenure-track professorial-stream appointment in **Global Health Policy** at the rank of Associate Professor to commence July 1, 2019. Salary will be commensurate with qualifications and experience. Applicants must specialize in global health with a focus on areas such as global health governance, political economy approaches to health, comparative health systems and policy, social determinants of health, and/or coordination of global health and humanitarian assistance across national health systems. Expertise in global health architecture, human rights, health care ethics, or global health leadership is an asset. Applicants must have a completed PhD in Global Health Policy or a related field of social science or law with a strong global health governance, policy, politics and equity focus.

The deadline for receipt of applications is November 15, 2018.
